

Track severe weather

SWIFT Weather has released SWIFT Mobile—a severe-weather tracking tool specifically designed for use with handheld devices. The new software runs on Windows mobile devices, including Motorola Q, Palm Treo, Samsung BlackJack and T-Mobile Dash, SDA and MDA.

It features more than 1,100 weather maps, weather radar down to the street level, GPS tracking, perimeter reports and up-to-the-minute data feeds from 140 weather service offices.

Audience response

One of the latest trends in the continuing-education market is audience response technology. Nothing beats being able to gauge the immediate impact of the time and resources invested in a training session. **Turning Technologies'** TurningPoint turns training into an interactive two-way communication exchange, engaging audience members like never before. It integrates 100% into PowerPoint and lets audiences participate by submitting responses to interactive questions using a ResponseCard keypad.

Visual EMS software

Emergency Technologies, Inc. has released a new version of its Visual EMS software. The Visual EMS e-PCR module manages information on patients and the care provided to them at the scene of an incident. It is fully integrated with CAD systems and customizable to handle an agency's codes and protocols. Data stored in Visual EMS can be exported for reporting, billing or other purposes and is HIPAA- and NEMSIS-compliant. The Communication Server module allows users to automatically fax specific reports.

Tablet PC with biometric access

Xplore Technologies Corp. has introduced the new iX104C3 tablet PC with durable fingerprint reader and user-accessible hard drive and PC card bay. The release marks the first-ever use of biometrics for data access on a rugged pen-tablet computer. The iX104C3's fingerprint scanner allows the benefit of security authentication, and its hard drive and PC card bay let users better manage and maintain control of sensitive materials. The iX104C3 incorporates WLAN, WWAN, PAN (Bluetooth) and GPS wireless options that can be used simultaneously.

Interpretation technology

The **Language Access Network (LAN)** has made the first live two-way video interpretation technology that provides real-time interpretation in more than 150 languages 24 hours a day. LAN's MARTTI (My Accessible Real Time Trusted Interpreter) system is designed to deliver live two-way wireless, mobile videoconferencing services that connect hospital, clinic

and other medical providers to qualified medical interpreters for virtually every language spoken.

RESPONDER

Glass Breaker Carbide Tip:
It's small, but it can be a real lifesaver. In an emergency, a sharp blow with the carbide tip cracks glass-enabling trapped accident victims to escape.

RESPONDER
